Caldwell University

Caldwell, NJ

- Represented 200+ students, advocating for academic policies and organizing 3 events that increased engagement by 40%.

PROJECTS

Feedora | *Python, React, Next.js, Supabase, Claude API* | [Live](#)

2025

- Built an AI-powered news aggregator that curates and summarizes content from multiple RSS sources in real time.
- Integrated Claude API for article summarization; moved RSS fetching server-side to resolve CORS issues; added dark/light mode and bookmarking.

RT_Convo | *Next.js 14, Supabase, WebRTC, Gemini API* | [Live](#)

2025

- Developed a real-time messaging platform supporting 1-on-1 and group chats, WebRTC voice/video calls, and an AI auto-reply feature.
- Managed user authentication, database schema migrations in Supabase SQL Editor, and production deployments via Vercel.

GlobeNest | *Next.js, Supabase, Mapbox* | [Live](#)

2025

- Built a private, real-time family presence platform for cross-border families with live map pins, safety check-ins, and invite-only circles.
- Implemented real-time location sharing, timezone-aware presence modes, and mood/weather overlays using Supabase and Mapbox.

IT Help Desk Ticket Tracker | *Python, MySQL, Docker* | [GitHub](#)

2024

- Built a full-stack help desk ticketing system to log, track, and manage IT support incidents with status updates and priority levels.
- Implemented persistent MySQL storage and Dockerized the app for portability, mirroring real-world IT incident management workflows.
